# Install Seat Cover

**SEAT DOES NOT NEED TO BE REMOVED TO INSTALL COVER.**

Turn seat back cover partly inside out. Slide over the top of the seat. Make sure the armrest hole is on the correct side.

From behind the seat, pull the tabs tight and secure to velcro on the back of the seat cover.

Work the cover all of the way down the seat back. Un-do the velcro flap below the armrest so that you can pull it all of the way down.

Place the seat bottom cover over the seat bottom with the flaps at the back. Push the flaps in between the seat back and seat bottom.

Push the velcro flaps in between the seat back and bottom.

Drop the string (shown in red) between the plastic trim and the seat cushion on both sides.

Fasten the velcro tab below the armrest.

From behind the seat, pull the strings tight underneath and secure with the StringLock. (see next page)

# THE STRINGLOCK

1

Run one string through the channel on the end of the StringLock.
